

SLYRS 100% Malt Whisky

It all started in 1994: trained brewer and master distiller Florian Stetter went on a study trip to Scotland. He is surprised by the similarities to his homeland of Upper Bavaria: mountains, clear water and wonderfully clean air. Added to this is the sometimes stubbornness of the Scots, which seems very Bavarian to him, a dialect that is difficult to pronounce and a clear tendency toward a free state.

So many Scottish-Bavarian crossovers and his visits to world-famous distilleries in the Speyside region inspire Florian Stetter to imagine a single malt from Upper Bavaria.

Using the finest ingredients and loving craftsmanship, we are opening a new era with Slys Malt whisky. Our young, dynamic team of distillers has spent a lot of time perfecting this unique whisky.

With a love of craftsmanship and aging in new American white oak barrels, Slys' DNA has its own new character in the form of vanilla, malt and caramel flavors.

Master distiller Hans Kemenater, traveled for several with Anton Stetter, co-founder of the Slys distillery in the United States, to learn as much as he could about how to manage, replicate and create the best rye whisky.

"Bavaria Urkorn" rye produces a sweetish malt, dominates the flavor and is perfectly supported by bouquets of two "grain minorities" - malted barley and unmalted barley. The **three-grain mash**, which features a predominance of rye, gives rise to this whiskey.

What makes Slyrs whisky so special? Is it the sun-ripened Bavarian summer barley, good spring water or gentle maturation? A blend of all these ingredients under the guidance of experienced distillers creates a strong aroma with a slight hint of smoke and a wonderfully fresh nose. In addition to regular casks, barrels that previously contained port, sherry or Sauternes are used to mature this German whisky. Preserved cask strength for added character.

Oloroso Sherry leaves the faintest notes of fruit and wood in its barrel aging (450-500L barrels). Bavarian Single Malt Slyrs poured into this barrel then have about a year to absorb these aromas from the wood.

Port wine is very popular for its strong fruity notes. Strict regulations for its production, as well as controlled storage for at least **three years**, make the **wine** from the upper Douro Valley and its deep side valleys a delicious specialty.

It also benefits from Slys malt whiskey, which has been aged in Tawny Port barrels for up to nine months.

Pedro Ximénez is a sherry variety made from white, ripe grapes with an intoxicating fruity aroma and flavor. The classic sherry grape is the **palomino grape**, which is heavily dried and therefore has a high sugar content as a result of sherry processing. A finish in the barrel that previously held this unique sherry gives the whiskey mouth-filling fruity aromas that provide a mellow aftertaste.

After the malt whisky has been **aged in American white oak barrels** for about half a decade, it is transferred to **barrels in which the famous rum from the island of Jamaica** was previously aged. Jamaican rum is very strong and spicy in flavor. Before bottling, it is aged for several months in wooden barrels, in which Slys Malt Whisky is later finished. Some barrels that previously contained rum agricole (made from sugar cane - not molasses, as is usually the case!) **from the Caribbean island of Martinique** are also used by Slys to finish the whisky.

Named after the Sicilian port city of Marsala, Marsala liqueur wine was originally fortified to preserve it for transport by ship to England. "Force up" means that distilled alcohol is added to the grape mash during fermentation, which stops fermentation and preserves the residual sweetness of the grapes. After **three years in American white oak barrels**, the malt is transferred to barrels that were previously aged in Marsala. The wine's fruity aromas enter the malt through these Whisky barrels and blend with the malt notes.
