Spirit Depot

Everything besides the usual.

Alcohol is **much more** than intoxicating drug. For millennia, it has **shaped our culture, influenced the development of the mind, religion and art.** The very etymology of the word alcohol directs us towards beliefs and traditions that, in their simplicity, defined **alcohol as a spirit.** The Spirit, who with his presence opens the door to our near reality, opens our tongues, opens up the horizons of our thoughts. Following **Jan Himilbsbach**, they introduce a fairy-tale element to reality. A balance to reality from the words of **Linn Ullmann**, *"The thing is to be three drinks before drunkenness and two drinks after reality."*

Mysticism is surrounded by the very creation of alcohol also. Not knowing what the mating process was, our ancestors considered the missing portion of the alcoholic drink **a tribute to angels** (angel's share) or **other mischievous spirits** (duppy share). This tribute was in return for the possibility of creating *aqua vitae* or **water of life.**

Spirit Depot

In 2020, SPIRIT DEPOT was born out of many years of experience, getting to know the aromas and tastes of consumers, and the desire to bring unique alcohols closer to everyone. A composition of spirits enchanted in bottles for centuries of human existence.

SPIRIT DEPOT

OUR STRENGTHS

team

An experienced team built on knowledge and fascination with the alcohol category. We don't pretend - we like and taste it.

value chain

Transparent value chain for all customers.

drinkability

We have created our own principle according to which we select alcoholic beverages for our portfolio, we colloquially called it the "drinkability" principle. We believe that it is the aroma and taste that should build interest and fascination with a given category or favorite alcohol.

logistic

Many years of experience of one of the most recognizable FMCG distributors in Poland gives us logistic facilities that always provide perfect service: transport insurance, completeness of orders and punctuality.

COMPOSITION OF OUR ALCOHOLS

01

Whisky / Whiskey

single malt, single grain, whiskey, bourbon,

WHISKY / WHISKEY from Europe

WHISKY / WHISKEY from the rest of the World

The Lakes Single Malt

Whiskymaker's Reserve No 6

Each Whiskymaker's release is an artistic exploration of oak and the composition of **single malt whisky** - the evolution of taste and defining the style of the distillery. Creating new whisky requires some kind of structure, but there **must be room for freedom**, for following your gut and instinct. The architecture of each Whiskymaker's Reserve release will evolve in line with the growing influence of sherry casks and our sense of adventure.

Whiskymaker's Reserve No.6 is an aromatic expression, matured in the best, carefully sourced and selected American and Spanish oak barrels formerly PX, Oloroso, Cream Sherry and red wine. Bottled at 52% ABV. **Limited edition to 8,000 bottles.**

The Lakes Single Malt Whiskymaker's Editions Resfeber

The Whiskeymaker's Editions series exemplifies The Lakes Distillery's sense of adventure. Every one a one-off edition is an expression of creative freedom, the inherent goal of which is to create unique flavors.

With a core of **cream sherry casks** and additional character from **red wine casks**, Resfeber fills the excitement and energy at the beginning of a journey, the restless race of the traveler's heart before setting off. We venture into the less explored territory of sherry casks - lively and complex, creamy yet tart, with aromas of toffee-dipped apple, delicate baking spices, notes of Maraschino cherry jam and rose petals, and a warm finish. We are on the path to enlightenment, fueled by new discoveries, excited by progress and our collective thirst for adventure. Who knows what the next version of single malt whiskey from The Lakes distillery will be...

The One Signature Blend

It is a unique blend of selected Scotch grain and malt whiskeys from the Highlands, Speyside and Islay. The heart of each composition is single malt whiskey from The Lakes distillery. The One Whiskey Collection is a showcase of our expertise in whiskey maturation and blending. Each individual version has been finished in the finest oak casks, adding a **new dimension** to the flavor profile and demonstrating the influence of **oak casks**, proportions, time and **commitment** in enhancing the flavor of the whisky.

Non-chill filtered for a richer mouthfeel and fuller flavor. The One boasts a unique, versatile form that makes it perfect for savoring alone or enjoyed with ice or a few drops of water.

The One Sherry Cask

It is a unique blend of selected Scotch grain and malt whiskeys from the Highlands, Speyside and Islay. The heart of each composition is single malt whiskey from The Lakes distillery. The One Whiskey Collection is a showcase of our expertise in whiskey maturation and blending. Each individual version has been finished in the finest oak casks, adding a new dimension to the flavor profile and demonstrating the influence of oak casks, proportions, time and commitment in enhancing the flavor of the whisky. Non-chill filtered for a richer mouthfeel and fuller flavor.

Only 4512 bottles are available from the bottling, which are mainly aged in Oloroso and PX barrels. The softer and more porous Spanish oak encourages a greater degree of interaction between the spirit and the barrel. The more open grain allows the whiskey to penetrate deeper into the wood, bringing out rich and intense flavors as well as creating a beautiful and natural color.

McCONNELL'S Irish Whisky

McConnell's Irish Whiskey is a blend of the best Irish whiskeys rested in bourbon barrels for a **minimum of 5 years**. JJ McConnell owned one of the first whiskey warehouses in Belfast, his hometown. A devastating fire consumed the entire warehouse in April 1909, destroying over half a million gallons of Irish liquor. But JJ McConnell fought hard for his business and showed resilience and perseverance during this difficult time... In the 1900s some Irish distillers began using the "e" to distinguish their "uisce beatha" from its Celtic cousin whiskey from across the Irish Sea. Scotch whiskey has also become a player in exports, mainly to the US, and some, thinking of differentiation from it, have started adding the "e". **McConnell's Irish Whiskey was founded in 1776**. Its creation also precedes the introduction of formal changes and regulations. McConnell's Irish Whiskey remains faithful to its origins and cultivates **over 125 years** of production tradition.

KAMET Indian Single Malt

The name Kamet comes from the foot of the mountain at the foot of which a fertile supply land develops cereals for the whole of India. This area is synonymous with wealth and fertility - just like Kamet whiskey. Distilled from six-row barley grown at the foot of the Himalayas. It is matured in bourbon barrels, French wine barrels and sherry barrels. Distillery typical Scottish style stills installed in 2012. The creators of this item are icons in the world of whiskey - Surrinder Kumar, who is considered the father of Indian whiskeys, previously working for the Amrut distillery, with which he founded and developed the single malt whiskey program showing the production potential of India, and Nancy Fraley, who is one of the best Master Blenders in America, and numerous distilleries drew from its experience. Her path from theological education through legal practice led her to a passion for the world of whiskey and the search for its spirituality and rules. She currently serves as the Director of Education at the American Distilling Institute (ADI).

MACALONEY'S Invermallie Red Wine Barrique

There was once a little Scotsman, **Graeme Macaloney**, who found a summer job bottling whiskey and fell in love with Uisge Beatha, the "water of life". He dedicated his heart to finding a way to make a living from whiskey, although circumstances found a way to turn his dreams away. Invermallie is our connoisseur/collector's edition.

Like the flowing river of Mallie, it is an ever-changing series of classic single malt expressions based on unique, one-off single casks or other special selections. With individually numbered bottles, it is sought after by lovers of good Whiskey. This special edition of Invermallie comes from a selected, **re-charred Portuguese red wine barrel** imported from Europe. This "barrique" has been treated by **Dr. Jim Swan** shave-toast-rechar and produces a wonderfully complex nose of red berries, dried fruit, demerara sugar, leather, oak and honey. The palate is creamy and full-bodied with layers of tropical fruit, wood spices, dark fruit cake brandy, cigar, cocoa, Maltesers, oats and honey. The finish is long with dried fruit and lingering oak.

MACALONEY'S Searaidh Braicheaken

There was once a little Scotsman, **Graeme Macaloney**, who found a summer job bottling whiskey and fell in love with Uisge Beatha, the "water of life". He dedicated his heart to finding a way to make a living from whiskey, although circumstances found a way to turn his dreams away. Invermallie is our connoisseur/collector's edition.

Our first single malt **matured in sherry barrels**. Not only is this single malt "finished" in sherry casks, but it is matured from start to finish in a **combination of Oloroso and Pedro Ximenez STR casks**. STR stands for Shave Toast Rechar, developed by the late great **Dr. Jim Swan**. This made our Mac on Braiche and Invermallie STR huge successes. Now, thanks to our Spanish cooperative in Jerez, we have **STR Sherry casks (225L)** that imbue solid oak notes, improved oxygenation and charcoal filtration to complement the powerful sherry bomb notes expected from single malts matured in Oloroso and PX. The classic single malt spirit at the heart of this spirit, **Searaidh Braiche**, won gold at the **2019 World Whiskey Awards** for best new brand in Canada and top 2 in the world. Searaidh Braiche also won a gold medal at the **2021 John Barleycorn Awards**.

MACALONEY'S Oaken Poitin

There was once a little Scotsman, **Graeme Macaloney**, who found a summer job bottling whiskey and fell in love with Uisge Beatha, the "water of life". He dedicated his heart to finding a way to make a living from whiskey, although circumstances found a way to turn his dreams away. Invermallie is our connoisseur/collector's edition.

Traditionally distilled using Irish methods and matured in selected **Portuguese STR (shave-toast-rechar) red wine barrels**, it is the first **triple-distilled pot still whiskey** in Canada and one of the first outside Ireland. Whiskeymaker Dr. Graeme Macaloney researched the **distillation process in Ireland** before recreating it here on Vancouver Island. He then layered on the puberty knowledge he learned from the legendary Dr. Jim Swan. Taste: full, creamy and smooth, with cereal notes and a symphony of floral and fruity notes, including roses, honey, nectarine, papaya, apricots, apples and candied orange. It is layered with red wine, black currant, wood spices and a lingering oak finish.

TOGOUCHI Single Malt

Togouchi is a premium and artisanal Japanese whisky brand produced by Chugoku Shuzo, based in Hatsukaichi, Hiroshima Prefecture. The distillery was founded in 1918 and has been producing sake and liquor for more than 100 years. Production of Togouchi whisky began in 1990. Togouchi whisky's unique aging process involves aging in an abandoned 361-meter-long railroad tunnel with a constant temperature of 15°C and 80% humidity. The whiskies are then blended and reduced with natural spring water from the neighboring Sandankyo Mountains. Although Japanese whisky-making methods are rooted in Scottish tradition, Japan has a great deal of blending freedom.

Created by master distiller Taihei Yamamoto. This single malt is a blend of bourbon and sherry cask maturation. Unlike Sakurao Single Malt, this one is matured in an abandoned railway tunnel in a low mountain range.

SAKURAO Single Malt Japanese Whisky

Founded in 2017 and inaugurated in 2018, Sakurao Distillery presents its first-ever single malt distilled, aged in Hiroshima Prefecture on Seto Island in the Inland Sea.

Created by Taihei Yamamoto, master detillator of the house of Sakurao, it is a foretaste of the character of future releases from this young yet characterful distillery. Created from a combination of single malt whiskies aged in bourbon barrels, new American oak barrels and sherry casks, in which the whiskey has been aged for a minimum of 3 years. The final composition also benefited from several months of maturation in mizunara barrels, a famous Japanese oak.

DUNVILLE'S 1808

Created in 1808 and revived in 2012, Dunville's Irish whiskey is a story of fame, fortune, tragedy and rebirth. Now restored to its rightful place among the world's finest whiskeys. Dunville's award-winning Irish single malt and vintage blend whiskeys are synonymous with superior quality, exquisite taste and a rich heritage. **An icon of its time**, Dunville's reign ended in the midst of a family tragedy. **For nearly 80 years, the only few bottles available** were considered eminently marketable. Echlinville Distillery is now the proud custodian of this iconic Belfast brand.

The name 1808 pays homage to the date of the creation of Dunville Irish whiskey, It was created in the heart of Belfast and from there became one of the most famous whiskeys in the world. A blend of malt, grain and pot still whiskeys. Strong and uncompromising, bold and confident, charming and sincere like the city of its birth.

DUNVILLE'S Three Crowns

Created in 1808 and revived in 2012, Dunville's Irish whiskey is a story of fame, fortune, tragedy and rebirth. Now restored to its rightful place among the world's finest whiskeys. Dunville's award-winning Irish single malt and vintage blend whiskeys are synonymous with superior quality, exquisite taste and a rich heritage. **An icon of its time**, Dunville's reign ended in the midst of a family tragedy. **For nearly 80 years, the only few bottles available** were considered eminently marketable. Echlinville Distillery is now the proud custodian of this iconic Belfast brand.

Dunvilles Three Crowns is a light and delicate Irish blend. Echlinville has resurrected this famous old brand that was once produced at the Royal Irish Distillery in Belfast. For the current bottling, 3 fine whiskeys were drawn from 3 different types of casks. Just the right concept for such a named whiskey!

DUNVILLE'S Three Crowns Peated

Created in 1808 and revived in 2012, Dunville's Irish whiskey is a story of fame, fortune, tragedy and rebirth. Now restored to its rightful place among the world's finest whiskeys. Dunville's award-winning Irish single malt and vintage blend whiskeys are synonymous with superior quality, exquisite taste and a rich heritage. **An icon of its time**, Dunville's reign ended in the midst of a family tragedy. **For nearly 80 years, the only few bottles available** were considered eminently marketable. Echlinville Distillery is now the proud custodian of this iconic Belfast brand.

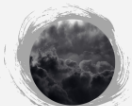

We are pleased to announce the arrival of Dunville's Three Crowns Peated. It consists of **single grain whiskey, 10 year old single malt whiskey and 15 year old single malt whiskey** finished in Oloroso sherry casks. The barrel in which this combination was matured was **heavily peated** before pouring. A rare, delicately smoked Irish whiskey.

DUNVILLE'S 20YO Oloroso Sherry

Created in 1808 and revived in 2012, Dunville's Irish whiskey is a story of fame, fortune, tragedy and rebirth. Now restored to its rightful place among the world's finest whiskeys. Dunville's award-winning Irish single malt and vintage blend whiskeys are synonymous with superior quality, exquisite taste and a rich heritage. **An icon of its time**, Dunville's reign ended in the midst of a family tragedy. **For nearly 80 years, the only few bottles available** were considered eminently marketable. Echlinville Distillery is now the proud custodian of this iconic Belfast brand.

Another release from the Echlinville distillery has now appeared in a **very limited quantity**. Only 3,000 bottles of the 20-year-old Irish whiskey Oloroso Cask Finish from the reborn giant Dunville's are going on sale. As the name suggests, the single malt was finished in exquisite Oloroso sherry casks and bottled at the Echlinville distillery. In total, the composition was **matured for 20 years**, making it exceptionally rich. As usual for the distillery, this Irish whiskey was not cold-filtered so as not to taint Dunville's distinctive rating.

DUNVILLE'S 18YO Port Mourant Rum Finish

Created in 1808 and revived in 2012, Dunville's Irish whiskey is a story of fame, fortune, tragedy and rebirth. Now restored to its rightful place among the world's finest whiskeys. Dunville's award-winning Irish single malt and vintage blend whiskeys are synonymous with superior quality, exquisite taste and a rich heritage. **An icon of its time**, Dunville's reign ended in the midst of a family tragedy. **For nearly 80 years, the only few bottles available** were considered eminently marketable. Echlinville Distillery is now the proud custodian of this iconic Belfast brand.

This exceptional whisky has been masterfully finished in just eight specialty **casks** from the closed Port Mourant Estate distillery in **Guyana**. These barrels previously held the **extremely rare 41-year-old Demerara Rum** from the world's last surviving double wooden distiller. Founded in 1732, the Port Mourant Estate distillery produced some of the **world's finest Demerara rums**. Their casks were lined with rich dark molasses, imparting an intensity of flavor that resonates nearly half a century later in the nose, palate and finish of this rarest of whiskeys.

MATT D'ACRY 10YO Port Cask

Founded in Newry, County Down in 1817, Matt. D'Arcy & Co. Ltd. were among the best producers of Irish whiskey in the northern part of Ireland. In addition to brands such as Old Comber and Dunville's Irish Whiskey, in the 19th century Matt. D'Arcy helped build an Irish whiskey industry that was the envy of the world.

Echlinville Distillery is now the guardians of that good old Irish whiskey. Echlinville is also home to Dunville's and Old Comber, proudly bringing together three of the most historic "lost" Irish whiskey brands, giving them their rightful place at the forefront of the Irish whiskey renaissance.

The first blended Irish whiskey in more than a century, released by Matt D'Arcy & Co. Ltd. A 10-year-old grain whisky was blended with a 17-year-old single malt to create this release.

7 YARDS Scotch Whisky

Created in 1880 by Gaston Tessendier, the distillery now covers an area of more than 25 hectares located in Jarnac. The fourth generation of Cellar Masters, Lilian and Jérôme Tessendier, distill, compose and blend eaux-de-vie thanks to the rigor and daily attention of the entire team. By embarking on whisky production, it is opening a new page in its history.

Seven Yards is a blended Scotch whisky. On his first visit to the Scottish distillery he works with, Jérôme Tessendier was impressed by the height of the cellars. The casks can be stacked up to 7 layers, which is roughly equivalent to 7 yards. Hence the name chosen for this whiskey.

This cuvée (origins: wheat and barley) was pre-matured for 7 years in Scotland in old bourbon barrels, and then matured in France for 3 months in old oak cognac barrels. This whisky is unfiltered cold, has a natural color and contains no added sugar. It will seduce connoisseurs with notes of tobacco and dried plums, grilled aromas, and on the palate with delicacy and dryness. Pleasant roundness with woody notes and a spicy finish.

ARLETT French Single Malt

The Tessendier family has been at the forefront of the art of distilling for generations. The latest project is **Arlett French Whisky**, a vintage-style brand that pays homage to the 1950s, **named after the mother** of Jerome and Lilian Tessendier, who today run the distillery. The Tessendier brothers' constant search for flavor to create new spirits was the impetus for the creation of this whisky item.

Every stage of development was carefully thought out, discussed, tested. From barley selection to barrel selection, the sum of these choices has **resulted in a whisky that is completely true to Distillerie Tessendier** with its style and philosophy. And because they brew, distill and mature all of Arlett's production, its quality is perfectly controlled.

Arlett French Single Malt is **matured for 3 years** in new American oak barrels and bourbon casks.

CLYDE MAY'S Alabama Whiskey

"Say watcha be and be watcha say." - so said Clyde May, a humble moonshiner whose spirits bear his name.

Raised by a single mother, he grew up during the **Great Depression**, where resilience and character were essential to survival. Clyde May proudly served in the 77th Infantry Division during World War II. He earned the **Bronze Star and the Purple Heart**.

Clyde knew a lot about making the **best moonshine**, even if his methods were somewhat outside of US regulations. His high standards and commitment to quality established his reputation as the **"most sought-after"** moonshine in Alabama, if not the country. You'll taste these qualities in every sip of his whiskeys and bourbons, created from the purest possible spirits, **aged for years** in charred oak barrels.

Distilled since 1946, legal since 2001. Over 70 years of authenticity, dedication, honesty and perseverance - that's what it takes to become the **first official liquor** of the state of Alabama. Based on the original recipe, the whiskey is aged four years in oak barrels.

BALCONES Baby Blue

Our distillers personally sample the contents of **each Balcones barrel** before bottling to ensure the quality and flavor we accustom our fans to meet their exorbitant expectations. These are **authentic craft whiskies and whiskeys** and are never blended with artificial colors or flavors. All Balcones Distilling releases are always non-chill filtered, which retains the rich oils and esters of our **unadulterated Texas whiskey**.

The first Texas whiskey on the market since Prohibition. The Baby Blue unveiling is a whiskey made from **roasted blue corn**. This rich and oily corn adds freshness to the sophistication, a traditional corn whiskey. At the same time, it adds new aromas and flavors while maintaining the jam of classic American distilling.

CLONAKILTY Double Oak

Located on the waterfront, in the heart of the town of Clonakilty, the three gleaming copper alembics are an inspiring sight. This is where we distill our award-winning brand using the finest ingredients, our experience and the opinions of our friends. This is where the magic begins and is the home of Clonakilty whisky.

The first installment of our Clonakilty Cask Finish series. This whisky is finished in port barrels from the Douro Valley. The entire maturation and bottling process takes place in our warehouse of the edge of the land and the Atlantic Ocean.

The whisky is matured in bourbon barrels, first-fill American oak barrels and tan European red wine oak barrels refreshed using the NEOC - New Era Of Cask method. This makes it the world's first Irish whiskey finished in a NEOC barrel. NEOCs are former red wine barrels from the Bordeaux region of France. They are hand-barrelled by traditional coopers and refired to the specifications of individual distillers.

GLEN TALLOCH Choice, Blended Malt, 12YO

Glen Talloch is an excellent whisky made in true Scottish tradition, with no less than 30% malt whiskies aged for at least 5 years. These carefully selected malts have been expertly blended.

For a slightly more complex flavor (i.e., a deeper, richer flavor profile), we recommend the 12 year old release. This beautiful Scotch whisky is aged for at least 12 years and consists of 40% malt whiskies from various distilleries. Experienced whisky connoisseurs often call it complex and harmonious, which we fully understand.

True connoisseurs call Glen Talloch Blended Malt "malt of the truest kind." That's because this blend consists exclusively of single malt whiskies - and good ones at that! This also makes it the most complex whisky of the entire Glen Talloch family. This whisky is aged a minimum of 8 years before it goes into the bottle.

EVADÉ French Single Malt

Around the world, France is a country known not only for producing some of the best wines, but also for laying out all the **know-how** involved in the **production of wines and spirits**. They have marked several key elements for the creation of spirits, such as cultivation of the land, cooperage, fermentation, distillation, maturation, blending... A **complete experience and preparation** that allows France to produce the highest quality products, from the land to the bottle. France, famous for producing indigenous spirits such as cognac, armagnac and calvados, returns to the origins of distillation to create whisky.

Evade French Single Malt Whisky is double distilled in Charentais alembics. The whisky is **aged for 3 to 5 years** in various types of barrels, both old, previously used for aging other spirits, and new. We use French oak barrels where the whisky is **aged 36 months**, new American oak barrels, cognac barrels used only once and Burgundy red wine barrels. Its color is natural without any color additives. It is also not cold-filtered.

EVADÉ Peated French Single Malt

Around the world, France is a country known not only for producing some of the best wines, but also for laying out all the **know-how** involved in the **production of wines and spirits**. They have marked several key elements for the creation of spirits, such as cultivation of the land, cooperage, fermentation, distillation, maturation, blending... A **complete experience and preparation** that allows France to produce the highest quality products, from the land to the bottle. France, famous for producing indigenous spirits such as cognac, armagnac and calvados, returns to the origins of distillation to create whisky.

Evade Peated Single Malt is double-distilled in Charentais stills, then aged for 4 to 7 years in bourbon barrels and new American oak barrels. The whisky is not cold-filtered, and its color is natural with no color additives. Peatiness at 35 ppm.

HWAYO Single Grain

"Hwa" means fire, and "Yo" symbolizes a precious object. The name Hwayo captures the Korean brand's philosophy of using nature's abundance to create a rare, precious beverage. The brand was created by Kwangluyo, a company specializing in high-quality ceramics and known for its fine Korean tableware since 1963, giving rise to the Hwayo brand. In the spirit of conquest and the relentless pursuit of quality, the Hwayo teams decided to blaze their own trails, creating a year later the first Korean whisky made exclusively from rice: **Hwayo X.Premium**. South Korea hopes to become the next country to be closely watched on the Asian whisky scene.

Hwayo X.Premium is the **first Korean whisky made exclusively from rice**. This single grain has no additives. Its philosophy is based on the use of main ingredients drawn **directly from nature's bounty**: pure, crystalline stonewater from Yeosu Province and **short-grain japonica rice** grown in Korea.

MAY-LÓAG Oriel

At Old Carrick Mill Distillery, we use centuries-old Irish traditions combined with modernity to create a product steeped in Irish heritage and unique flavors. Our spirits are **handcrafted by our master distiller** using only the finest, carefully selected ingredients combined with our naturally filtered spring water, which flows to us through the limestone-famous County Monaghan.

A blend of triple-distilled malt whiskey and column-distilled grain whiskey, aged in bourbon, red wine and sherry barrels. May-Lóag's new flagship blend, inspired by the ancient Kingdom of Oriel, where The Old Carrick Mill in Derrylavan is located. Their signature whiskey is an approachable and versatile Irish whiskey with a **unique May-Lóag touch** that really stands out from the crowd.

SLYRS 100% Malt Whisky

It all started in 1994: trained brewer and master distiller Florian Stetter went on a study trip to Scotland. He is surprised by the similarities to his homeland of Upper Bavaria: mountains, clear water and wonderfully clean air. Added to this is the sometimes **stubbornness of the Scots**, which seems very Bavarian to him, a dialect that is difficult to pronounce and a clear tendency toward a free state.

So many **Scottish-Bavarian crossovers** and his visits to world-famous distilleries in the Speyside region inspire Florian Stetter to imagine a single malt from Upper Bavaria.

Using the **finest ingredients and loving craftsmanship**, we are opening a new era with Slyrs Malt whisky. Our young, dynamic team of distillers has spent a lot of time **perfecting this unique whisky**.

With a love of craftsmanship and **aging in new American white oak barrels**, Slyrs' DNA has its own new character in the form of vanilla, malt and caramel flavors.

SLYRS Rye

It all started in 1994: trained brewer and master distiller Florian Stetter went on a study trip to Scotland. He is surprised by the similarities to his homeland of Upper Bavaria: mountains, clear water and wonderfully clean air. Added to this is the sometimes **stubbornness of the Scots**, which seems very Bavarian to him, a dialect that is difficult to pronounce and a clear tendency toward a free state.

So many **Scottish-Bavarian crossovers** and his visits to world-famous distilleries in the Speyside region inspire Florian Stetter to imagine a single malt from Upper Bavaria.

Master distiller Hans Kemenater, traveled for several with Anton Stetter, co-founder of the Slys distillery in the United States, to learn as much as he could about how to manage, replicate and create the best rye whisky.

"Bavaria Urkorn" rye produces a sweetish malt, dominates the flavor and is perfectly supported by bouquets of two "grain minorities" - malted barley and unmalted barley. The **three-grain mash**, which features a predominance of rye, gives rise to this whiskey.

What makes Slys whisky so special? Is it the sun-ripened Bavarian summer barley, good spring water or gentle maturation? A blend of all these ingredients under the guidance of experienced distillers creates a strong aroma with a slight hint of smoke and a wonderfully fresh nose. In addition to regular casks, **barrels that previously contained port, sherry or Sauternes** are used to mature this German whisky. Preserved cask strength for added character.

After the malt whisky has been **aged in American white oak barrels** for about half a decade, it is transferred to **barrels in which the famous rum from the island of Jamaica** was previously aged. Jamaican rum is very strong and spicy in flavor. Before bottling, it is aged for several months in wooden barrels, in which Slys Malt Whisky is later finished. Some barrels that previously contained rum agricole (made from sugar cane - not molasses, as is usually the case!) **from the Caribbean island of Martinique** are also used by Slys to finish the whisky.

SLYRS Marsala Cask

It all started in 1994: trained brewer and master distiller Florian Stetter went on a study trip to Scotland. He is surprised by the similarities to his homeland of Upper Bavaria: mountains, clear water and wonderfully clean air. Added to this is the sometimes **stubbornness of the Scots**, which seems very Bavarian to him, a dialect that is difficult to pronounce and a clear tendency toward a free state.

So many **Scottish-Bavarian crossovers** and his visits to world-famous distilleries in the Speyside region inspire Florian Stetter to imagine a single malt from Upper Bavaria.

Named after the Sicilian port city of Marsala, Marsala liqueur wine was originally fortified to preserve it for transport by ship to England. "Force up" means that distilled alcohol is added to the grape mash during fermentation, which stops fermentation and preserves the residual sweetness of the grapes. After **three years in American white oak barrels**, the malt is transferred to **barrels that were previously aged in Marsala**. The wine's fruity aromas enter the malt through these Whisky barrels and blend with the malt notes.

TEERENPELI Kaski

Teerenpeli Single Malt whiskies are produced at the **Teerenpeli distillery** using Finnish malt from a **local malt** factory and fresh and hard Salpausselkä ground water. We use traditional distillation and maturation methods and original copper distillation equipment.

Traditionally in agriculture, before farming, the first thing was to cut and burn the land to produce **KASKI (the first grain)**. Hence the name of the whisky, Kaski is the first phase of cultivation - a new beginning.

Kaski is matured only in selected **sherry casks**, giving it the color of roasted brown sugar. The aroma has fruity notes and light peat. The taste is smooth, grainy and rich. The typical spicy aftertaste of the Teerenpeli distillery combines with raisin fruitcake.

SANTISIMA TRINIDAD 3YO

The name of the rum comes from the Spanish Navy sailing ship "Santisima Trinidad", which for years was considered the world's tallest ship. Launched in 1769, this launch caused terror among British and transport organizations. To this day, in Spanish-speaking culture, it is a symbol of greatness and the fight for one's faith and culture.

Santísima Trinidad is made with **aguardiente liqueur**, like all Cuban rums. It gives the rum a more nuanced character than ten from anywhere else in the world. However, our aguardiente is of exceptional quality. It comes from **selected molasses** and undergoes a long aging and ripening process. Time gives the rum more delicate and delicate flavors. we say that **Santísima Trinidad is the first liquid Cuban rum**.

Created through a **two-stage aging process**, both in American white oak barrels. In the first stage, aguardiente liqueur is aged for a year and a half. In the second stage, the base rums are aged for **1 to 6 years** until the desired flavor and aroma profile is achieved.

THE DUPPY SHARE White

As the whisky ages, some of it evaporates. In Scotland and Ireland they believe it is a **tribute to the angels** and call it The Angel Share. In the Caribbean, they believe in something else - **mischievous Duppy Spirits**. According to the belief, Duppy spirits sneak between distilleries and steal the best batches of rum. This "disappearing rum" is called The Duppy Share.

Duppy White, the first white rum to be designed to be drunk as a shot, as well as in classic white rum-based cocktails. Perfect for celebrating life and highlighting unforgettable nights.

Co-created with music pioneer Kano - it's a **5-year-old rum** born from memories, smells and flavors that reflect its Jamaican roots and the deep influence of Jamaican culture on London and the world.

100% Jamaican rum, created at the Worthy Park distillery. Reflects the fullness of life, filling the sensation with tropical fruitiness and a spicy aftertaste.

El GALIPOTE White, Spiced, Dark, Pink

El Galipote, also known as the Drone or Lugarú, is a legendary Dominican figure from San Juan who is believed to have originated in the 17th and 18th centuries. It was a **mythical creature** characterized by its ability to transform into various animals and objects. People who encountered these creatures often got into trouble under the persuasion and mischievous behavior of the creatures.

El Galipote White is a light and aromatically balanced rum. Subtle citrus notes are complemented by hints of vanilla.

Dark El Galipote perfectly showcases a high quality Caribbean rum with a distinct flavor. The color is reddish amber with semi-sweet aromas of dried fruit and caramel.

El Galipote Spiced is a smooth blend of more than 10 natural spices, including cloves, cinnamon and dried fruits. The rich, deep flavor comes from the Caribbean.

El Galipote Pink is probably the first pink rum on the market. It is a blend of Caribbean white rum and natural strawberry flavor. Perfect for creating a refreshing pink mojito!

OLD CAPTAIN White, Brown, Black

In the 17th century, several ships and different captains sailed the world's oceans. There were virtuous captains who went in search of spices, textiles and precious metals. But there were also rebel captains who were more interested in **the finer things in life, such as rum**. A rebel captain roamed the Caribbean looking for ingredients and rums from Jamaica, Barbados, Cuba, Martinique, Puerto Rico and Trinidad. Later, many other captains followed his example. But because this adventurous sea wolf was the first, he was given **the nickname "Old Captain,"**

Old Captain's traditional white rum is a well-balanced blend of different types of light rum from the Caribbean. Its slightly sweet and fruity aroma blends harmoniously with its mild flavor and soft, dry finish.

Old Captain Brown has a mild character and a distinctive aroma with fruity notes of apricot and plum.

Old Captain Black rum is a traditional and pure black rum. A balanced blend of different types of rums from the Caribbean. The full-bodied aroma blends harmoniously with the rich flavor.

NAGA Java Reserve

Naga are, according to Hindu beliefs, mythical creatures that inhabit the underworld where they guard the treasures of the earth. The figures are illustrated as a combination of a snake and a dragon, a symbol of abundance and fertility, and follow the underground to steal the best batches of rum.

Before sugar cane was ever planted in the Caribbean, the people of South Asia were drinking Arrack. In the late 15th century, merchants reaching the island of Java discovered that planters had developed a recipe for fermenting Asian sugarcane using yeast derived from red rice.

Java Reserve is distilled on the island of Java in a traditional Asian alembic called Tiangous. This method of making rum from molasses dates back to the Middle Ages. Like Chinese Baijiu and Japanese sake, the rum is fermented from molasses and fermented Javanese red rice. It is then aged for 3 years in calabash wood barrels, followed by 4 years in American Bourbon oak barrels.

NAGA Pearl of Jakarta

Naga are, according to Hindu beliefs, mythical creatures that inhabit the underworld where they guard the treasures of the earth. The figures are illustrated as a combination of a snake and a dragon, a symbol of abundance and fertility, and follow the underground to steal the best batches of rum.

Before sugar cane was ever planted in the Caribbean, the people of South Asia were drinking Arrack. In the late 15th century, merchants reaching the island of Java discovered that planters had developed a recipe for fermenting Asian sugarcane using yeast derived from red rice.

Naga Pearl of Jakarta Indonesian rum is aged in three different types of barrels. First of all, it spends 3 years in calabash wood barrels, which are responsible for the spicy finish. This is followed by 4 years in American oak Bourbon barrels, giving it notes of vanilla and roasted almonds. Finally, it is placed in cherry wood barrels for 1 year to bring out the honey and cherry flavors.

NAGA 10 YO Siam Edition

Naga are, according to Hindu beliefs, mythical creatures that inhabit the underworld where they guard the treasures of the earth. The figures are illustrated as a combination of a snake and a dragon, a symbol of abundance and fertility, and follow the underground to steal the best batches of rum.

Before sugar cane was ever planted in the Caribbean, the people of South Asia were drinking Arrack. In the late 15th century, merchants reaching the island of Java discovered that planters had developed a recipe for fermenting Asian sugarcane using yeast derived from red rice.

The molasses, which comes from Thai sugarcane, is fermented for 36 hours before distillation in a distillation column. This resulting rum contains 67% alcohol, and then goes into bourbon barrels made of American oak for 10 years. During maturation, rum losses are replenished only with the same rum, and the maturation process itself takes place on a plain below sea level to keep evaporation to a minimum and the process stable.

NAGA Anggur Edition

Naga are, according to Hindu beliefs, mythical creatures that inhabit the underworld where they guard the treasures of the earth. The figures are illustrated as a combination of a snake and a dragon, a symbol of abundance and fertility, and follow the underground to steal the best batches of rum.

Before sugar cane was ever planted in the Caribbean, the people of South Asia were drinking Arrack. In the late 15th century, merchants reaching the island of Java discovered that planters had developed a recipe for fermenting Asian sugarcane using yeast derived from red rice.

Anggur means wine grape in Indonesian. To create this rum finish, we filled 220-liter French oak Seguin Moreau barrels, which contained Château Pas de l'Âne 2019 Saint-Emilion Grand Cru vinified by Nicolas Baptiste for 18 months, with Naga Java Reserve rum at 65% strength. Six weeks later, we released the rum and filtered it. This is an unprecedented combination of Asian spirits-making culture with a European complement and fizz.

Before sugar cane was ever planted in the Caribbean, the people of South Asia were drinking Arrack. In the late 15th century, merchants reaching the island of Java discovered that planters had developed a recipe for fermenting Asian sugarcane using yeast derived from red rice.

Indonesia is the world's largest producer of spices. So in creating Naga's spiced rum, it was obvious to name it Malacca after the port in Malaysia from which ships loaded with Asian fruits and spices depart for Europe. Kumquat peel, Indonesian jambu (Java apple) pulp, citronella and coriander are used to give the Indonesian rum citrus flavors and freshness in the finish.

CENTENARIO 30YO Real Select Cask

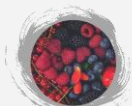

The history of Ron Centenario began in 1985 in the city of San José, Costa Rica. That's when Centenario Anejo Especial was created as the first rum in the great Centenario family. It was there that he prepared for the road for 7 years, and it was from there that he embarked on it - and not just because it was **named after a famous racehorse**. In the following years, this pioneer was joined by many other extraordinary rums brought to life by our **Master Blender - Doña Susana Masis**.

Ron Centenario Real is made using the **Solera process**. This means that it is a special blend of **15-30 year old distillates** that have been monitored and refined by the master blender for years. The rums were stored in the **finest oak barrels**, which were separated from the regular barrels and reserved specifically for this purpose. The result is a full-bodied rum with notes of red fruits, vanilla, almonds, chocolate and wood. The **unusual rum shows off a perfectly balanced** side with exquisite flavor and a silky smooth finish.

CENTENARIO 30YO Edicion Limitada

The history of Ron Centenario began in 1985 in the city of San José, Costa Rica. That's when Centenario Anejo Especial was created as the first rum in the great Centenario family. It was there that he prepared for the road for 7 years, and it was from there that he embarked on it - and not just because it was **named after a famous racehorse**. In the following years, this pioneer was joined by many other extraordinary rums brought to life by our **Master Blender - Doña Susana Masis**.

Intense amber color. Richly fruity aroma with memories of the brandy in which it was aged. Sweet and delicate flavor, with endless persistence on the palate, is a blend of rums aged in white American oak barrels for up to 30 years

J. BALLY White, Ambre

The J. Bally distillery was founded by Jacques Bally in Martinique. He produced his spirit in a similar manner to the creation of French eaux-de-vie. Bally distills fresh sugar cane juice to produce a distinct selection of rums. In 1917, Jacques Bally also began aging his rums in oak barrels. This gave both a new color and many dimensions of flavor. In 1924, the rums were first packaged in distinctive rectangular bottles. The old distillery closed in 1989 and moved to Distillerie du Simon, where the rum is now produced. J. Bally produces a white rum and several basic expressions, as well as a selection of vintage rums.

Distilled from pure sugar cane juice, this rum document of the Martinique DOC appellation is an example of quality and authenticity. J.Bally's version of Ambré consists of several aged rums that have been matured for a year in oak barrels. This classic and elegant rum embodies the true taste of Martinique. Soft and full-bodied, even for the best palate connoisseurs....

327 XO Double Aged

The creation of our blend begins with 4 Caribbean countries Guyana, Venezuela, Panama and Guatemala as the first step in the aging process, and then travels to mainland Europe for a second aging. Named after the year when sugar cane was first discovered to begin the history of rum. The history of rum began when it was discovered by the men of Alexander the Great. The first reference appears as "the cane that makes honey without bees,,, a record that appears during an Indian campaign in 327 BC.

As a result of double aging, we have created a unique aged rum. All our rums are matured for no less than 7 years in the Caribbean tropics in different barrels, which gives them a smooth and sweet taste. That's why we send the blend to Europe to finish it with unique tropical extracts using our own continental aging techniques. We use high quality spring water from the north to dilute our blend to 40% ABV, and then bottle it ourselves.

LA CRIOLLA White, Golden Spiced, Dark

"La Criolla" in Spanish slang means a woman born in the heart of Spanish America, meaning its roots are truly Caribbean.

La Criolla Caribbean White Rum - an unaged white rum created at a distillery in the Dominican Republic. The rum attracts with its crystal clear color and elegant, fruity-citrus flavor and aroma. The drink is ideal on its own or with ice, and is also indispensable as an ingredient in cocktails.

La Criolla Golden Spiced - a premium golden rum that uses specially selected Caribbean rums and a set of spices. The rum has a pleasant, rounded flavor and aroma with distinctive notes of cinnamon, vanilla, ginger and spices, and is ideal as a digestif, with cola, ice and as a base for a variety of cocktails.

La Criolla Caribbean Dark Rum - a premium dark rum created from a blend of rums from Jamaica and the Dominican Republic, then aged for a year. The rum attracts with its dark golden color, rounded flavor and aroma with hints of dried fruits, spices and tobacco, is ideal neat or on ice, and is also indispensable as an ingredient in cocktails.

SAMAI Gold

Known for its abundance of natural resources, Cambodia has an abundance of top-quality sugarcane; ideal for producing the thick caramel molasses that forms the basis of all our Samai rums. However, no one has explored these possibilities. Taking the Latin traditions of rum production to their Asian roots, our founders and team began their mission to create Cambodia's first distillery and premium rum brand from scratch.

The first rum in the collection, Samai Gold Rum is complex and full of character, presenting a flavor profile that reflects the uniqueness of the Cambodian terroir. This award-winning rum has become a reference for all rum lovers around the world. Mixed with a drop of local organic honey, Samai Gold Rum reveals the intensity of Cambodian molasses, making it a class of its own.

SAISON Original

A meticulous selection is made of distillates from 3 different terroirs on the Caribbean islands of Barbados, Trinidad and Jamaica. The Master Blender's intention is to show the typicality of these terroirs in perfect balance, thanks to the richness and intensity of molasses distillation in stills combined with the delicacy and lightness of sugar cane distillation in columns.

The selected rums are primarily aged for up to 5 years in American white oak barrels. This aging takes place in the terroirs of origin, taking advantage of the heat and specific humidity of the Caribbean islands, which provide exceptional oxidation of the future rum, accelerating maturation and concentrating flavors. The aged rum now travels across the ocean to France, where it is blended by cognac master Jerome Tessendier.

The blend rests in mature French oak barrels on the banks of the Charente River for 9 months. This finish will provide stability and balance while bringing in the rancio notes characteristic of old cognacs. The rum is then gradually reduced to 42%; no sugar is added.

SAISON Reserve

A meticulous selection is made of distillates from **3 different terroirs** on the Caribbean islands of Barbados, Trinidad and Jamaica. The Master Blender's intention is to show the typicality of these terroirs in perfect balance, thanks to the **richness and intensity of molasses distillation** in stills combined with the delicacy and lightness of sugar cane distillation in columns.

The selected rums are primarily **aged for up to 8 years in American white oak barrels**. This aging takes place in their terroirs of origin, taking advantage of the heat and specific hygrometry of the Caribbean islands, which provide exceptional oxidation of future rums, accelerating maturation and concentrating flavors. The aged rums now travel across the ocean to France, where they separately finish **for 12 months in more than 50 mature French oak barrels** on the banks of the Charente River. Each barrel will give the rum its own special characteristics depending on its age, size and what cognacs it previously contained.

Through a barrel-by-barrel finishing process, Cellar Master is able to draw from the **complex and diverse aromatic palette of more than 50 barrels** to create a harmonious blend. His methods result in a strong, fruity and oily rum. The rum is then gradually reduced to 43.5%. No sugar is added.

SAISON Sherry Cask

A perfect balance between the **terroirs** of Barbados and Trinidad with a hint of Jamaica. The selected rums are primarily aged **for up to 10 years** in **American white oak barrels**. This aging takes place in their terroirs of origin, taking advantage of the heat and specific hygrometry of the Caribbean islands, which provide exceptional oxidation of future rums, accelerating maturation and concentrating flavors.

Saison Rum XO is the result of selecting and blending unusual batches of rums **matured in their countries of origin**: Jamaica, Barbados and Trinidad. Each batch is then matured in barrels originally used for Distillerie Tessendier cognacs. Depending on their age, size and previously contained cognacs will give each batch a particular typicity. This double maturation encourages a marriage of flavors and highlights the subtlety of this unique rum, **which is at least 10 years old**.

This unique maturation process provides the Cellar Master with a wide range of flavor profiles, which he can then combine to produce a generous rum that is both complex and rich in flavor.

[rum](#)

[spirit depot](#)

Three bottles of Saison Rum Triple Cask are displayed, each in its original presentation box. The bottles are 750 ml and 40% ABV. The flavors are Barbados, Jamaica, and Trinidad. Each bottle is shown in its original presentation box.

The selected rums are primarily **aged for 5 years in American white oak barrels**, in which the bourbon was previously aged. The **aging takes place at the point of origin**, taking advantage of the heat and specific humidity of the island, which provide exceptional oxidation of the future rum, accelerating the maturation and concentrating the flavors. The aged rums now travel across the ocean to France, where they will be **blended by cognac master Jérôme Tessendier**. His intention is to reveal the character of the terroir through a unique technique, blending the different batches according to their different aromatic profiles: floral, fruity and spicy.

The blend then rests in **mature medium-grained French oak barrels** at Jarnac (France) to bring out lightly roasted and spicy aromas. Finally, the last subtlety, the rum will be finished in "fine-grained" French oak barrels to create a delicious and harmonious finish. The rum is then gradually reduced to 46%. No sugar is added.

PANAMA PACIFIC Reserva 5YO, 9YO, 15YO, 23YO

The journey of Panama Pacific rum begins at the **Las Cabras distillery**, a Panamanian sugar mill built a century ago, in 1919. Due to the vagaries of changing global geopolitics, the manufactory fell into a state of neglect and was slowly seized by the jungle. **In the 1990s, it was found** and saw potential for restoration. Tearing through the overgrowth, a 1922 copper and brass alembic was discovered from American & Brass Works of Cincinnati, Ohio. Las Cabras Distillery was born, and world-class rum was ready for the world!

Panameño sugar cane from the famous La Provincia de Herrera growing region. The freshly harvested cane is crushed to **extract the juice within 15 hours of harvesting**, then boiled and centrifuged to separate the sweet and mineral-rich molasses for fermentation. We **ferment the molasses using a proprietary yeast partially extracted from pineapples**. Distillation in a 1922 copper-brass column still creates a distinctive, deep, round flavor. We obtain the rum at 75% strength before aging. Reserva expressions are aged for additional years in used, **fired but not charred whiskey barrels** from Tennessee and Canada.

BOLIVAR Venezuela 8YO

An extremely pleasant and slightly sweet Bolivar rum that is produced and aged in beautiful Venezuela. It was distilled using a column alembic from the highest quality local sugar cane, giving it a truly tropical character.

The rum is named after Simon Bolivar, known as a liberator and Venezuelan hero who played an important role in gaining independence from Spain for several South and Central American countries, including Venezuela. In addition, the Bolivar is the national currency of Venezuela.

Tropical ripening is three times more intense than ripening in cooler climates. The tropical heat intensifies the interaction between rum and wood. The rum was aged in American white oak bourbon barrels for 8 years, which gave it a pleasant woody aroma with notes of spices and nuts.

After aging, cocoa and vanilla distillates were added to the rum, resulting in a unique flavor with excellent balance and finesse. We recommend serving neat or in cocktails.

EL SUPREMO 8YO

El Supremo is a rum produced by the **Capasa Distillery**, one of only two distilleries in Paraguay known for producing exceptional rums according to a traditional recipe that has remained unchanged for decades. The name **El Supremo** refers to the **national hero** behind Paraguay's independence.

Paraguay's fertile soil produces the best organic sugarcane in the world, which is **hand cut, harvested** and then loaded onto carts pulled by oxen to the mill where it is crushed. After the sugarcane juice is extracted, it is boiled in large open vats over an open fire **for 9 hours to produce must and honey**, after which it is further fermented for 3 days and is ready for the distillation process. **Slow distillation** of the fermented syrup in distillation columns yields the famous "Cana Paraguaya," a sugar of honey consistency. The aging process takes place **first in local marron incienso barrels**, a highly aromatic noble wood, and is then finished in **French oak barrels for 8 years**.

MONTANYA Platino 1YO

We start at the **Elk Avenue distillery** by fermenting pure sugar cane from native growers and a family-owned mill in Louisiana. The sugar cane, water and yeast ferment for six to seven days. After fermentation, the "wash" goes into the main alembic (they are copper and handmade at Dtilarias Ea de Vie in Portugal). **The alchemy begins when** our distiller heats the whole thing to separate the alcohol from the water. Complexity arises in the process, as the liquid coming out of the distiller contains **several hundred different alcoholic compounds**, each with a different taste and boiling point. We carefully monitor the distillation results - we keep what tastes great and discard the rest - the process is called cutting. After harvesting the best part of the rum, we pour it into American white oak barrels, in which Laws of Colorado whiskey was previously stored **for 2-5 years**. We move the barrels from the Elk Avenue distillery to our Barrel House and Bottling Facility in Riverland, two miles south of town. There they are matured until the rum is ripe and smooth.

The Platino version is aged in barrels for one year. Before bottling, the rum is filtered by coconuts naturally to remove the color.

SAINT BENEVOLENCE Haiti Clarin

Saint Benevolence was founded by Calvin and Chase Babcock in 2017 as a way to combine their love of rum with the charitable work they have been doing for four decades in collaboration with Reverend Gueillant Dorcinvil. The town of Saint Michel de l'Attalaye is the center of their collective charitable work and is well known for their Rum Clairin, a rum-fueled **agricole-style terroir** popular throughout Haiti. The ubiquitous sugar cane farms and Reverend Dorcinvil's distillery in Saint Michel inspired the creation of Saint Benevolence as a way to share this **uniquely Haitian rum** and their passion.

Bwason Pou Bonte, in Haitian-Creole, which means "Drink to Goodness,, is an expression that embodies the joyful spirit of the Haitian people, as well as the philanthropic ethos of Saint Benevolence.

Every sip of Saint Benevolence rum directly **funds charitable efforts** through our long-standing nonprofit partners, repaying the people of Haiti through life-saving medical services, educational programs and economic development.

WILLIAM GEORGE 2YO

William George™ rum was created to honor two great men who strove for integrity and embodied strength. and the unique blend was created with passion and commitment to offer the world a unique taste, so you can experience the iconic taste of white rum again.

The compass, which represents an iconic symbol in rum history, points 11 degrees west. The direction represents true north calculated from Victoria Falls at the time William and George lived in Africa. True north interpreted as "the right path" signifies "integrity" as a core value of our brand.

William George is a blend of six rums. Four of the six are from Jamaica and the other two are from Trinidad and Tobago. One of the rums from Trinidad and Tobago is aged for 2 to 5 years in 200-liter bourbon barrels and then filtered through carbon to remove the color. The other five rums in the blend are unaged.

All rums from Jamaica are pot still distilled, while rums from Trinidad and Tobago are distilled using column stills.

NATIVO Overproof 108

Auténtico Nativo is a matured rum made from local sugar cane grown in the mineral-rich volcanic soil of the **Herrera region of Panama**. It is continuously distilled in the **classic 1922 copper and brass distillery** in Las Cabras.

The alcohol is made from **hand-harvested sugar cane grown**, fermented locally with one of the most important rum masters and distilled in copper column alembics that are nearly a century old. It then goes into **white American oak barrels**. These rums are known for their near perfect balance, a testament to the Master Blender's artistry.

This overproof is a rare and delicious work of art. The combination of a **unique aging and maceration** process results in this wonderful "must try" rum in the overproof category. The rum is a selection of **8-year-old copper alembic rums aged in bourbon barrels** with maceration of local chocolate to add a natural chocolate flavor. Nativo Overproof is well balanced. The flavors spread elegantly, while allowing the rum character of the alcohol to do its thing.

TAPANAGA Single Estate, Premium Reserve

The first high quality rum from a single estate in South Africa. Our rum is Africole Rum, bottled in limited batches to create a unique product for those who want to enjoy a distinctive, high-quality African rum.

We grow the **finest varieties** of sugarcane on our, family-owned farm, which are then **harvested by hand** and put through our press to squeeze the fresh cane juice. Africole Rum is made by distilling fermented, fresh sugarcane juice in combination with our wild and specially cultured yeast. It captures the best of our fermentation process.

Tapanga Single Estate rum is aged in oak barrels. All of the sugar cane is sourced from a single, our family-owned estate. It shows our roots and affection for this land.

Tapanga Premium Reserve is our flagship five-year-old Africole Rum aged in oak barrels.

THE LAKES English Gin, Pink Gin

Lakes Gin is our **classic English gin**. We conquer flavor by using only a few select botanicals, gently infusing them with the finest British wheat spirit, **distilling in our traditional copper alembic** using only the purest water from our home in the Lake District National Park.

We source only the finest ingredients, always ensuring consistency of flavor and year-round freshness. By **steeping the plants overnight**, like leaf tea, they freely interact with the warm alcohol to stimulate a **slower release of essential oils**, protecting their delicate nature. With a long, slow and gentle distillation in our traditional copper still, it is an exceptionally smooth London-style gin, designed to showcase the distillery's freshness and innovation.

A variant of **Pink Grapefruit**, we further enhance the gin's freshness with a **grapefruit zest** aroma and flavor.

RIVO Foraged Gin

Rivo Gin is distilled with 12 botanical ingredients, including many rare ingredients hand-picked in the meadows around Lake Como. The main goal in creating Rivo was to capture the essence of the mountains, wind and waters of Lake Como. We believe we have created a gin worthy of this rather special place.

Ethnobotanical experts collect and certify the origin of the herbs to use only the best, guaranteeing the highest achievable quality.

For centuries, local women have scoured the surrounding meadows of Lake Como in search of herbs and flowers to prepare traditional medicines and fortifying liqueurs. While some may argue that these women possessed dark healing magic, we consider them the pioneers of medicinal distillate production.

Each batch is numbered by hand, as production comes from only one annual harvest.

RIVO Sloe Gin

Rivo Gin is distilled with 12 botanical ingredients, including many rare ingredients hand-picked in the meadows around Lake Como. The main goal in creating Rivo was to capture the essence of the mountains, wind and waters of Lake Como. We believe we have created a gin worthy of this rather special place.

Ethnobotanical experts collect and certify the origin of the herbs to use only the best, guaranteeing the highest achievable quality.

In autumn, the first wild blackthorn fruits appear, which we harvest by hand near Lake Como. However, we wait for the first signs of cold, which, by breaking the skin of the fruit, releases intensified aromas. The harvested fruit is then left in the Rivo Gin for several months, enriching its classic taste and giving it a delicate, sweet flavor and a red, ruby color.

Each batch is numbered by hand, as production comes from **only one annual harvest**.

MG Extra Seco, Rosa Gin

The history of our gin begins with the founding of the MG distillery in 1835. In 1940, we began producing one of the **first gins in Spain**. Now, with **75 years of experience** and five generations committed to tradition, innovation and quality in our products, we are returning to our roots to recapture the original 1940 recipe. **Nothing but grain alcohol, juniper, angelica, our copper alembics and water.**

Our distillers are made of copper, we load them by hand and we carry out the entire distillation process by hand: from temperature control or separation of the different batches of alcohol to their filtration at the end of the process.

MG Gin is a classic gin, made using the London Dry Gin method, which is dominated by juniper. Precisely because it is the main ingredient in the distillate we produce, we control its cultivation at our farm in Teruel, harvesting and selecting it personally.

Gin MG Rosa derives its natural aroma from the maceration process of strawberries only and exclusively from Spain. No artificial additives, no enhancers.

LE TRIBUTE Gin

Juniper. We select and hand-pick the best top juniper berries from the Giró family's rural estate in Teruel.

Lemongrass. After a month of trying to extract the oils from citronella, we found that this means with water.

Orange and lemon. We use two suppliers of Valencia oranges and Seville lemons, which we macerate together, ensuring a perfectly balanced distillate that blends with the rest of the exclusively botanical components of our gin.

Grapefruits. We use grapefruit suppliers that perform perfectly, meaning there is no bittersweet taste.

Kumquat. A citrus fruit that comes from the chin, which provides acidity and quality.

Lime. The queen of the finish, complementing the fresh taste of the gin.

WILLIAM KERR'S Borders Gin

William Kerr, was a botanist from our hometown of Hawick. Kerr was one of the 19th century's great plant explorers. From his travels, including the islands of Canton, Java and the Philippines, he brought plants to the Royal Botanic Gardens at Kew.

Regular filtration would take away the delicious flavor and texture of our locally grown barley, so instead, the **spirit is evaporated through charcoal inside the distiller itself** and is never filtered as a liquid. **This is the only gin in the world made this way**, and the result is full of character and incredibly creamy in texture.

Distilled with extreme care, with an uncompromising commitment to quality from barley to bottle. **A 100% Scottish gin**, capturing the character of the country.

ARCHIPELAGO Botanical Gin, Barrel Reserve

It was here, in the rich volcanic soil of the Philippine Sea island archipelago, that sugarcane was born 4000 BC. In the centuries that followed, explorers carried this new treasure into their homes. From the time of Alexander the Great, who introduced sugar to Europe around 300 B.C., to Marco Polo, who recognized the plant's enormous potential as a commodity for trade.

The first true kraft distillery in the Philippines, owned by one family from the beginning.

Our flagship gin, made from 28 botanicals, 22 of which are harvested in the Philippines. Among them are fresh pomelo, dalandan, calamansi, dayap, mango, Benguet pine, sampaguita, ylang-ylang and kamia flowers.

The same flagship gin is matured in new American oak barrels to create the Barrel Reserve release. The gin rests there for up to 12 months. Before pouring, the barrels are toasted Burgundian style meaning quite gently to allow the wood to open up. Toasting allows the oak to impart a rich blend of aromas, while adding intense complexity to our alcohol.

JIN JIJİ High Proof Dry Gin

Jin Jiji India Dry Gin is a handcrafted Indian gin, distilled in small batches with wild Himalayan juniper. At Jin Jiji, we hope you find happiness, peace and tranquility - like a daily glass of meditation. We use only locally sourced plants and spices that have been used in medicine for centuries to create this composition.

The name Jiji comes from the Hindi word "jijivisha" and means "desire for life,,.

Jin Jiji High Proof is inspired by the Royal British Navy, which first set a high requirement for transporting gin to India during colonial times. Since space is limited on ships, the Navy preferred higher strength alcohol because more alcohol could be stored in less space. The 57% strength also ensures that the gunpowder won't be contaminated in the event of a spill.

ECHLINVILLE Irish Single Estate Gin

Our premium whiskeys, gin and poitín are distilled from barley that we malt the **old-fashioned way on the distillery floor**. Each grain is repeatedly wetted, dried and turned by hand - with a shovel, just as our ancestors would have done. It's hard work and takes time, but we believe in doing things the right way, not the easy way.

From the **Lecale Peninsula in Northern Ireland** comes the country's **first single estate gin**. The Echlinville distillery grows the barley used to make the base spirit on the estate, which is malted on a nearby farm. To give it a unique flavor, they chose local botanicals such as gorse bush petals and Strangford Lough seaweed. The result is a **gin with the essence of land and sea**.

VOTANIKON Greek Gin

Gin Votanikon contains herbs that can be found in most of the ravines, mountains and sunny island trails throughout Greece. This country has **one of the most diverse flora on earth**. It may sound common, but these amazing herbs are still present in most Greek cuisines.

The botanicals are meant to reflect the full **Mediterranean character** of the landscape and culture, so the composition comes from both the European continent and the islands: hejnik from under Mount Olympus itself, basil and lembi from Crete, juniper from the mountains of Macedonia, saffron from Kozania, mastic from Chios, citrus and chamomile from the Peloponnese, oregano from Mani and sage from Amorgos. In total, **there are 20 different ingredients** from the Mediterranean coasts and islands.

FOXTALE Dry, Citrus, Pink Strawberry

When the Little Prince in Saint-Exupéry's book meets a fox, the fox teaches him that **for two people to get along, they must be under the same spell**. That even if people only know each other for a short while, from that moment on, an everlasting bond forms between them. This story was the inspiration for The Foxtale Gin: it's more than alcohol, it's an anthem to friendship that's perfect for sharing moments with friends. And once a bond is created in the company of Foxtale Gin, **it will remain forever**, and will return as a memory whenever the "foxy kita" comes along. The gin is re-distilled from pure alcohol with natural botanicals, herbs and spices. Each ingredient is macerated and distilled separately then distilled together for the perfect balance.

Foxtale Citrus Gin combines the fresh and deep flavor of oranges from the Algarve, with the dry and dominant character of juniper.

Foxtale Pink Gin combines the sweet taste of strawberries and herbal mint with the dry and dominant character of juniper.

A copper distiller named Harry is located at the Royal Oak Pub & Hotel in the heart of Yattendon. Berkshire Botanical's philosophy is to create sustainable botanical spirits inspired by the plants growing on the Yattendon estate, and Berkshire Botanical Dry Gin takes its inspiration from the growing Christmas tree with the common spruce.

Berkshire Botanical distillery looked at the plants surrounding the Yattendon estate where it distills its liquor and was inspired to create this gin! It's infused with rhubarb and raspberries, hence its pink hue, though it still contains a healthy dose of juniper.

MINKE Irish Gin

Located on the waterfront, in the heart of the town of Clonakilty, the **three gleaming copper alembics** are an inspiring sight. This is where we distill our award-winning brand using the best ingredients, our experience and the opinions of our friends. This is where the magic begins and is the home of Clonakilty.

We climb the cliffs along our coastline to naturally **harvest native rock samphire**, only by hand and only in season.

The primary spirit used to make Minke Gin comes from whey produced on our **family farm near the Galley Head lighthouse**. This gives a unique velvety texture and mouthfeel to every delicious drop. With Minke Gin, we **stagger from herbs and grains to glass**, harvesting nature at its best.

LE TRIBUTE Mezcal

100% Wild Mature Agave Cenizo. Despite the wild nature, we plant 2 agaves for each one we harvest, which guarantees long-lasting production. In addition, we use 150% more agave than necessary to produce a higher quality liquid.

Jim's approach is to cut the agave leaves. While others cut to 5 cm, we cut it to 1.5 cm. The deeper you cut, the less bitterness in the alcohol, although it is much more expensive to produce. For this reason, we declare that Le Tribute mezcal is "pure heart" agave.

Cooked in traditional volcanic stone ovens. All the wood used to cook the agave is oak, which gives the mezcal its characteristic smoky flavor. All production is **done entirely by hand**; from harvesting and transport to the stone ovens, to creation, the grinding process, packaging and labeling.

Our mezcal is produced using traditional methods in Durango, Mexico. Its production is regulated by the demanding official Mexican standard and is produced in accordance with NOM-D248G. Alan Hernández, our mezcalero master, is responsible for controlling the process according to Le Tribute's unique recipe, which is produced at Bosscal Company's facilities.

OBELIU Crafted Vodka

At the heart of Obeliu Crafted Vodka is the liquor produced at Obeliu Distillery, a distillery built in 1907 by the last Count of Rokiski, **John Przewdziecki**, a man of refined taste and steadfast principles. When we say principles, we mean principles. He died for them in the Warsaw Uprising of 1944.

There is no great mystery in how spirits are made. But we have a **special recipe** to achieve the **highest quality of our drinks**. A very important part of it is putting the product to rest for a long period before it is bottled.

PUFFING BILLY Steam Vodka

Puffing Billy Steam Vodka is an unfiltered barley malt vodka, named after the rare distillate that plays a key role in its production. We first distill the spirit from locally grown barley and then distill it back into vodka using Puffing Billy, our specially named Carterhead Still.

Regular filtration would take away the delicious flavor and texture of our locally grown barley, so instead the spirit is evaporated through **charcoal inside the distiller** itself and is never filtered as a liquid.

This is the only vodka in the world made this way, and the result is full of character and incredibly creamy in texture.

ARCHIPELAGO Lava Rock

It was here, in the rich volcanic soil of the Philippine Sea island archipelago, that sugarcane was born 4000 BC. In the centuries that followed, explorers carried this new treasure into their homes. From the time of Alexander the Great, who introduced sugar to Europe around 300 B.C., to Marco Polo, who recognized the plant's enormous potential as a commodity for trade. The first true kraft distillery in the Philippines, owned by one family from the beginning.

A remarkably smooth, crisp and clean spirit that celebrates our artisanal distillation processes. Distilled by copper in small batches, our vodka is naturally filtered through lava rocks from Taal and Mayon volcanoes.

LIQUEURS

COUNTRY LANE Cream Liqueur

De Kuyper Country Lane - is a cream liqueur that **appeared in 1963**. Production is concentrated in the town of Midlarnis, in the same factory where the first liqueurs under the De Kuyper brand were produced. The unique elements in the production of Country Lane liqueurs are the mixture of cream and water at 5 degrees Celsius and the **process of double blending under high pressure**. The liqueurs rest in tanks where they are subjected to continuous stirring to achieve a **perfectly creamy consistency**. All flavorings are of natural origin from powdered selected African cocoa to vanilla from Madagascar.

Country Lane is available in renditions of classic Irish cream, chocolate, nougat or salted caramel.

BADEL Antique Pelinkovac

The original, unaltered **recipe dating back to 1862**. It has been meticulously kept secret and passed down from generation to generation since Badel was founded. The creator of this recipe was **Franjo Pokorny**, a Croatian merchant and **founder of Badel 1862**. Initially, this liqueur was only available in pharmacies as a "tonic for the stomach" to bring relief from stomach problems. This "medicine" very quickly gained fame and notoriety even in the Viennese and French courts where **Franjo became the exclusive supplier of herbal tinctures**. The original bottle in which the product is sold is still kept in the Zagreb City Museum.

Antique Pelinkovac has been produced **since 1862 in the same traditional way**, according to the original recipe, with 100% natural ingredients, including the indispensable wormwood. The beginning of this aroma and flavor is the aging of herbs and spices in alcohol and then this macerate goes into **copper cauldrons and is distilled in small batches**. The delicacy of this process is, to this day, cherished, which is why you can taste a product so close to its origins.

BEIRÃO Licor de Portugal

Licor Beirão is a Portuguese liqueur from the Beira region of Portugal. It dates back to the 19th century and is the most widely consumed liquor in Portugal.

Production began in the 19th century in Lousã, in the Beira region, where it got its name (Beirão means "from Beira"). The liqueur is still produced and bottled at Quinta do Meiral, according to the original secret recipe, by double distilling 13 different aromatic seeds, herbs and spices including mint, cinnamon, cardamom and lavender, from around the world, including former Portuguese colonies in Brazil, Sri Lanka and India. After the plants and herbs are weighed and blended, they are mixed with alcohol and left to macerate for twenty to twenty-five days. The resulting content is then distilled twice in copper alembics.

The use of natural plants and herbs is one of the main distinguishing features of this liqueur. When the macerate is ready, it is added to a mixture of alcohol, sugar and water. This mixture is then tested to make sure it fits the parameters of the secret recipe. Each bottle is girded with a hand-tied ribbon which emphasizes the craft nature of the liquor.

OTTO'S Athens Vermouth

King Otto, who moved the Greek capital to Athens, appointed Bavarian merchant and liquor maker Ioannis Vouher to create the first Greek vermouth. Following the innovative spirit of Athens, he created a liquor that to this day serves as a bridge between the tradition and history of the ancient city and the modern and vibrant European capital.

The vermouth is created with **99% ingredients of Greek origin**: kumquat, oranges, lemons, angelica, artemisia, rose petals and wormwood and a combination of Greek spices. Only the vanilla is imported from the best plantations from Madagascar. All these ingredients, combined with high-quality wine, capture the character of the Greek islands and the mountainous highlands of the mainland in the best possible way. As they say in Greece, **everything in the sunshine**.

EL BANDARRA Blanco, Rojo

The Virgili brothers are a trio of young, enthusiastic, creative, spontaneous and, above all, beverage and food-loving brothers. They are the perfect combination: recipe development is handled by older brother Jordi. Alex, one of the twins, is in charge of business and trade, while Albert is head of marketing and creativity. Together they intend to move the beverage industry by creating brands that are different, honest and, above all, fun.

El Bandarra Blanco is an appetizing, refreshing vermouth with a hint of vanilla. Our white aperitivo is made from **white Grenache and Xarel-lo grapes** and tastes like finding money in your pocket: unexpected and wonderful at the same time. The most traditional midday drink among friends in Barcelona,

El Bandarra Rojo is a smooth, appetizing aperitivo with a perfect bittersweet balance. It contains more than 50 botanical ingredients, such as cloves, cinnamon and bitter orange. Drink with ice and an orange slice. And throw in some olives too, after all, life is so short.

SLYRS Bavarian Cream

It all started in 1994: trained brewer and master distiller Florian Stetter went on a study trip to Scotland. He is surprised by the similarities to his homeland of Upper Bavaria: mountains, clear water and wonderfully clean air. Added to this is the sometimes **stubbornness of the Scots**, which seems very Bavarian to him, a dialect that is difficult to pronounce and a clear tendency toward a free state.

So many **Scottish-Bavarian crossovers** and his visits to world-famous distilleries in the Speyside region inspire Florian Stetter to imagine a single malt from Upper Bavaria.

In this Slys creation, an aromatic **single malt made from Bavarian barley** meets the **sweet temptation of real Alpine chocolate**. A sweet treat not only for liquor lovers, but also for whisky friends. Almost no food goes so well with a strong single malt as tart chocolate. Slys liqueur combines both flavors in a pleasantly mellow, yet full-bodied, exciting spirit.

THE LAKES DISTILLERY

CUMBRIA

The Lakes Distillery

Located within The Lakes District, not far from the southern Scottish borders. The district is entirely covered by the National Park, which is a UNESCO World Heritage Site. It was built in 2011 on the basis of Victorian buildings that conceal within their walls much of the history of the surrounding crops and lands. Based on a Victorian cross, we create our history based on faith, hope, happiness and love. Their result was the first alcohol obtained in 2014.

Dhavall Ghandi

An extraordinary person, extraordinarily important, a mainstay of our idea of whisky creation based on barrel exploration. A man who worked for many years in the financial industry, he left the corporate hustle and bustle to devote himself to creation and creation. Using his analytical experience, he first laboratory develops yeast combinations to then seamlessly move on to pairing and creating our whisky following his senses of smell, taste and intuition.

SPIRIT DEPOT
spirit depot our partners

Why is our
whisky special?

Genesis

It starts with the choice of barley variety and how it is malted. It was decided that The Lakes would be a non-peat whisky. We have cold, pure water from The Lake District National Park, which, when heated, is added to the milled barley to make a clear wort. Here we can influence the flavor. The slower you do the mashing, the fruitier the resulting spirit will be.

Fermentation

The wort must be fermented, but now the question is, which yeast to use? Yeast not only converts sugar into alcohol, but can play a fundamental role in creating flavor.

Under Dhavalla's leadership, we currently use a unique combination of yeast strains, which we use on different days and are blended at the end of the week. Our fermentation process takes up to 96 hours, twice the industry average, to achieve the desired complexity and depth of flavor.

Distillation

Distillation is slow and long with a very narrow cutting point; the greater the contact between alcohol vapor and copper, the fruitier and stronger the resulting spirit will be, to complement maturation in sherry, port or wine barrels. More than 80% of our whiskey is aged in sherry casks for 1-5 years.

SPIRIT DEPOT

spirit depot

The Borders Distillery

On the border of two worlds...

The Borders Distillery is the first distillery in The Borders areas in more than 180 years.

The first alcohol was obtained on March 6, 2018.

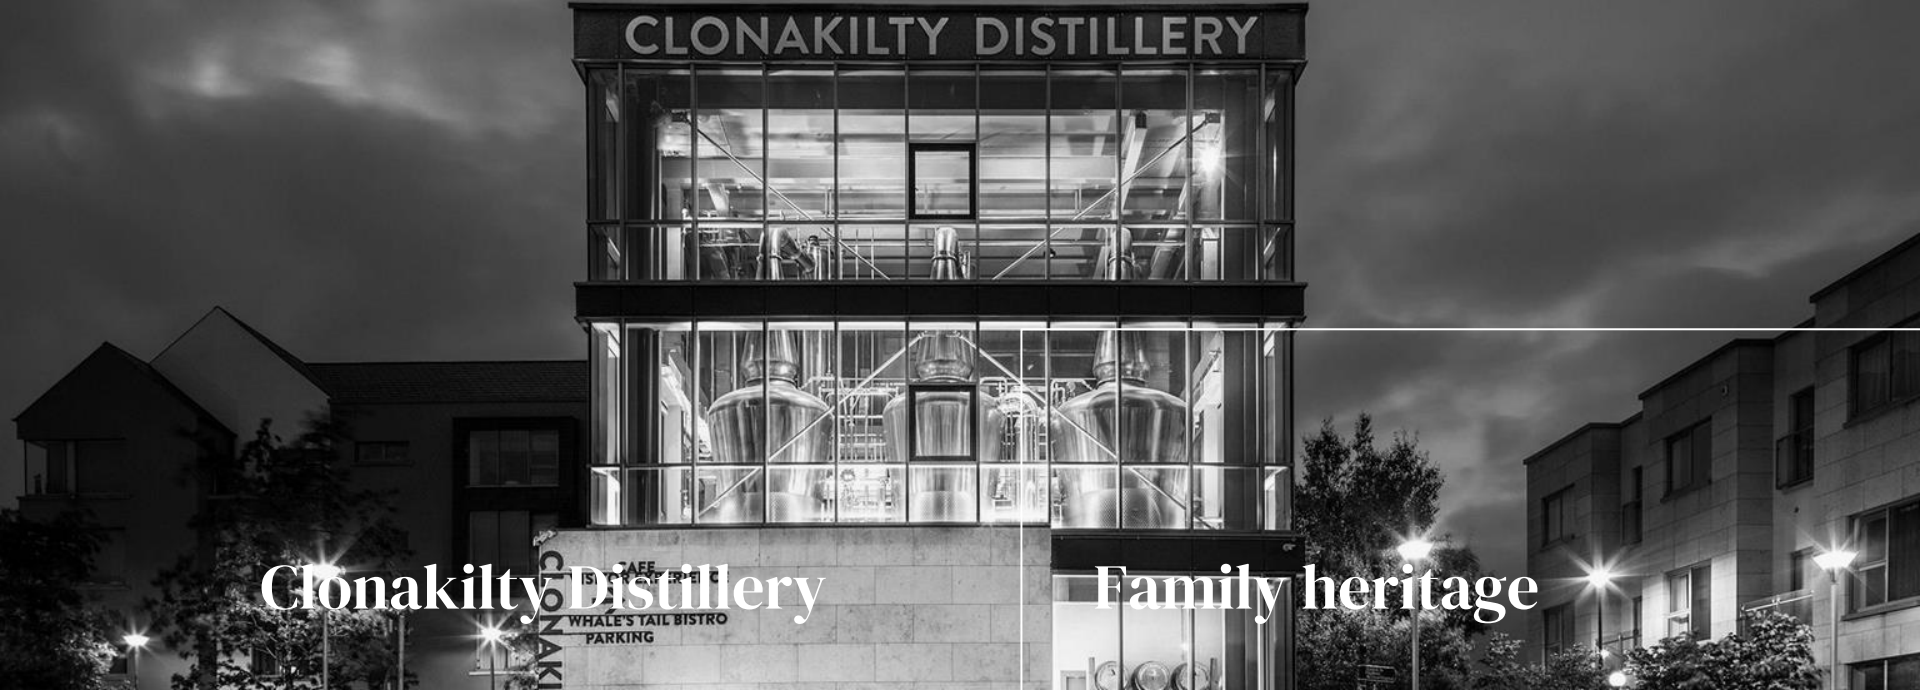

One of the distillery's highlights is its own Carterhead Still for distilling barley spirits. The resulting alcohol is incredibly subtle and retains the fullness of aromas and flavors.

The southern part of Scotland has been the site of some of the greatest battles and struggles for its independence in the country's history. This character is put into every bottle that leaves the distilleries.

The Borders Distillery is located in Hawick, the capital of the Scottish Borders county. One of the most important reasons why this location was chosen for the distillery is the availability of crystal clear water from the River Teviot.

SPIRIT DEPOT
spirit depot our partners

Clonakilty Distillery

The distillery was established in 2018, and in March 2019 we obtained our first drops of alcohol. We use our own barley to produce, triple-distilled, premium quality whiskey. Our barrel depot is used to mature the whiskey and is also the bottling site. Currently, 30000 liters of Clonakilty Whiskey are "resting" there.

In January 2020 we were awarded Best Irish New Make by the World Whiskies Awards and were named Producer of the Year according to Whisky Icons 2020.

Family heritage

Michael and Helen Scully are the founders of Clonakilty Whiskey. Michael is the eighth generation of his family to farm the Galley Head area. His family is one of the first to appreciate the West Cork area and notice its stable climate.

Now they are fulfilling their dream of creating their own whiskey. Whiskey that will be based on their own grain, matured under Michael's experienced and watchful eye.

A new venture, born of the land, in this breathtakingly beautiful peninsula of Ireland.

Liquid gold SLYRsee

Mighty peaks, vast fir forests and crystal clear streams that flow into the pristine peaks. The SLYRS distillery is located on Lake Schliersee. Our unique nature lies in every drop of our spirits. Combined with the Bavarian pioneering spirit, the art of distillation and a lot of passion, our SLYRS has become what it is today: a true Bavarian. A drop of liquid gold from SLYRSee.

Scotch-Irish roots

The word Slys itself comes from the Gaelic language, which has roots in Scotland. But the Slys distillery itself is thoroughly Bavarian. In 779, five monks from Ireland and Scotland founded a monastery in the Bavarian wilderness of Schliersee. Adalung, Hiltupalt, Kerpalt, Antonius and Otakir call this monastery Slys, correctly pronounced Schliers.

The Slys monastery has given its name to the entire Schliersee region over the centuries - and 1220 years later, also to the very unique Upper Bavarian single malt whisky.

SPIRIT DEPOT

Balcones Distilling

In 2008, Balcones was nothing more than an idea driven by a passion to create something original and authentic right here in the heart of Texas. It all started in an old welding shop by the Waco Bridge. Over the next year we replaced the roof, knocked out walls, laid bricks, cut pipes, installed copper alembics from Portugal, and built a whiskey distillery inside this quaint building.

Proud of what we had accomplished on our own, we began distilling in 2009.

Texas Babe !

We always have meticulously selected ingredients because of their richness of flavor. From Blue Babe corn grown in Texas to the first malted barley grown in Texas, we try to make the best use of our raw materials as they create a better whiskey.

We go to great lengths to preserve their luscious flavors in our spirits, so that every sip is a close expression of their original state. Every spirit we create is equal to this philosophy: whiskey should be recognizable and full of.

SPIRIT DEPOT

The Alpha Institute, Kingston

The Duppy Share

We are a partner of Alpha School of Music in Kingston, Jamaica. We recognize that we draw so much from the Caribbean - not just rum - but also our name and inspiration for rum design. We draw from the rich folklore and beautiful topography of the Caribbean. By sponsoring scholarships at the Alpha School of Music, we enable young people in Jamaica to gain the skills they need to succeed in the music industry. From every bottle, £1 is donated to the donation fund for this school.

The Duppy Share rums are original compositions and, as such, will always be the heart of our next releases. These are unique blends of a bold 3-year-old Jamaican rum full of tropical flavors from Worthy Park Distillery, founded in 1670, and a smooth, honey-buttery 5-year-old Barbados rum from Foursquare Distillery, founded in 1920 and named the world's best distiller for the seventh consecutive year in 2020.

SPIRIT DEPOT

A black and white photograph of a large, modern distillery building at night. The building has a corrugated metal facade. On the left, there is a logo featuring a stylized figure and the text 'SAKURAO DISTILLERY'. On the right, the word 'SAKURAO' is written in large, bold, sans-serif capital letters, with 'DISTILLE' visible below it. The building is illuminated by spotlights.

Sakurao Distillery

Unikalne Terroir

Sakuro Brewery and Distillery Co. Ltd. was founded in 1918 in Sakurao, Hatsukaichi, Hiroshima Prefecture.

For more than a century, our distilling technique has been passed down from generation to generation, and we have shared the experience of our long and illustrious history not only within Hiroshima Prefecture, but also around the world. We continue to respect the traditional techniques cultivated over the years. Sakurao Distillery launches new venture into whiskey and gin production.

Rich in a heritage that is unique in the world, we demonstrate a certain ability to transform it and transcribe it into expressions, each more precious than the next. Among these wonders, the distillery carefully utilizes the botanical ingredients of its terroir. The result is three sublime gin positions complemented by Japanese single malt whisky. Such a skill set promises a bright future for this young distillery. We remain committed to our uncompromising philosophy and grateful for our employees who have helped pave the way to our success.

Jacques Bally

J. Bally' story begins in 1917, when Jacques Bally bought a small sugar mill and water mill that had been built in the early 17th century. Bally then turned the refinery into a distillery. With a solid engineering background, he was able to build a new distillation column himself, as well as install a steam engine for power.

In 1924, Bally put all his efforts into maturing his rums. In the 1950s and 1960s, J. Bally's vintage rums gained a reputation as one of the best rum agricole in the world.

alembik J. Bally

J. Bally is made from the sap of fresh sugar cane harvested in January and February. The distillation process takes place at the Simon distillery, which still houses the original J. Bally alembik.

The distillery is located in the heart of Martinique. The spirits are initially aged in steel tanks for several months, after which they are matured in oak barrels. J. Bally rum is then bottled at 50% ABV with no other additions.

SPIRIT DEPOT

spirit depot

Heart and soul

The heart of whiskey may be grain and oak, but the soul of any alcohol is its connection to the place where it is made. We are proud of our roots on the Ards Peninsula and proud to be one of the first whiskey distilleries in Ireland. This pride of place is the essence of everything we do.

Our barley crops are nurtured by the unique microclimate of the Ards Peninsula. The area's unique topography, temperate climate, rich soil and salty air have long made it one of Ireland's best grain growing regions.

The Echlinville Distillery

Echlinville Distillery in Newtownards is Ireland's first agricultural distillery. We create our spirits from scratch, on land that has been farmed for generations. Every drop is distilled to perfection from barley sown, grown, harvested and malted by hand on our family farm.

In 1613, parson Robert Echlin came to this land from Scotland. 100 years later, his grandson built the Echlinville estate, which now serves as the heart of our distillery.

Paul Pomes i Manuel Acha

The oldest..

In 1831, Paul Pomés and Manuel Acha founded a spirits and liquor factory in a small workshop in old, pre-industrial Bilbao. Since then, our family has been passionately dedicated to distilling spirits and liqueurs, secretly preserving the recipes and production methods. The knowledge and experience gained and passed down from generation to generation are our seal of warranty. In constant evolution with trends and consumer market preferences, we have managed to develop and position more than 200 liquor references around the world, invariably maintaining the most demanding quality parameters in our traditional processes.

With invaluable historical value, Destilerias ACHA S.A. is the oldest operating company in the Basque Country, the oldest family-owned company in Spain and one of the three oldest family-owned companies in all of Europe. We have been located in Amurrio since 1884.

In our facilities you can see, still in use, our Charentaise style alembics, made in 100% copper by the house of Hervé & Moulin in the French region of Bourdeaux, which were acquired by our family in 1892 for 10,058 pesetas. In addition, you can visit our beautiful and complete distillation museum.

Tradition convinces

One of only two...

CAPASA is a Paraguayan cane company that offers a product with high quality standards in accordance with the requirements of the domestic and international markets through the integration of highly qualified personnel and exceptional Paraguayan cane.

The company is gaining increasing importance in the international market as a strong branch of Paraguayan exports. The increase in interest in the rum category, provides an opportunity to showcase the true qualities of Paraguayan traditional rums.

Its rich history has its roots in the "distillery union" in 1909. Many years later, in 1941, the Paraguayan Alcohol Corporation (COPAL) was created, which became the Paraguayan Alcohol Administration (APAL) in 1951. Since then, just over four decades passed before the Paraguayan Alcohol Administration became Cañas Paraguayas Sociedad Anónima (CAPASA) in 1993. Since then, CAPASA has taken on the position of uninterrupted production, distinguishing the company through quality, which translates into three brands that are proud of their tradition: Aristocrata and Parapití and El Supremo.

Three Friends

Our third-generation Master Distiller, Mike Nicolson, has spent his career distilling single malt whisky at 18 different Scottish distilleries from Lagavulin on Islay through Speyside to Glenkinchie in the lowlands. Whisky maturation expert, the late and great Dr. Jim Swan, heralded a new era of whisky production through barrel finishing and ensured that we had access to the best oak available. Finally, our founding whisky maker, Dr.

Graeme Macaloney, brings process production know-how and connoisseurship to this blend. This trio of Scotsmen has created a complex but balanced Canadian spirit that already surpasses some of our most beloved Scotches.

Macaloney's Distillery

Our world-class distillery is built around our traditional Forsyth's copper alembics. These hand-hammered behemoths produce remarkably smooth and full-flavored spirits, perfect for imbibing the unique flavors of our carefully selected oak barrels sourced from such far-flung places as Kentucky, Portugal, Spain and Scotland.

Locally sourced, our unique Canadian barley, with island water and air, yields a complex but balanced spirit, while ensuring the impeccable quality of the final drink.

Vilnaus Degtine

Two world wars have passed, the political and economic situation has changed, but Vilnaus Degtine has never stopped operating and has always remained true to its roots: tradition and quality. Located in the Baltics, in the east of Scandinavia, it is the largest producer of ethyl alcohol and a leading producer of spirits with the only operating spirit distillery in the region - Obeliu Distillery. In 2003, Vilnaus Degtine was acquired by the French Marie Brizard Wine & Spirits group.

Obeliu Distillery

The Obeliu Distillery was founded in 1907 by Count Jan Przezdziecki, at the time the largest landowner and grain producer in the region. At the beginning of the 20th century, it was one of the most modern distilleries in Europe and has been in continuous operation ever since. Modernization of the distillery was completed in 2016, ensuring sustainable and efficient production for years to come. Today it is the only operating ethanol distillery in the region, producing rectified ethanol from: rye, wheat, triticale, corn.

Conecuh Ridge Alabama Fine Whiskey

In April 2004, both chambers of the Alabama state legislature passed a resolution, now known as Act of Alabama 2004-97, calling Conecuh Ridge Alabama Fine Whiskey "the official liquor of the state of Alabama." For several months it was sold in Alabama itself and the states of Georgia, Tennessee and Florida. To this day, this whiskey is called "high-end moonshine" because it has retained its original character and the full aroma and flavor of the first illegal distilleries.

Kraina Clyde's Maya

The story of Conecuh Ridge whiskey begins with the figure of Clyde May, a legendary moonshiner and bootlegger from Alabama. From the 1950s to the 1980s, Clyde was able to produce about 300 gallons a week in alembics of his own design and manufacture in the woods near Almeria, Alabama, in Bullock County, southeast of Montgomery. His product was renowned for its high quality relative to typical moonshin

SPIRIT DEPOT

Arrack Batavia

Before sugar cane was ever planted in the Caribbean, before people first used the word "alcohol," in the lands of South Asia, the people there drank Arrack.

At the end of the 15th century, Portuguese and Dutch traders reached the island of Java. There they discovered Chinese sugar cane and learned the secret recipe for making arrack developed by local growers. The basis of this drink was molasses, fermented for a very long time, then distilled and aged in teak barrels.

Batavia is the Indonesian name for Jakarta, the capital of the country of Indonesia, located in the northwestern part of the island of Java.

Batavia Arrack, then, we can translate as "the spirit of Jakarta," and we can certainly say that Naga rums capture the fullness of traditional South Asian rums, preserving the spirit of the earliest Indonesian distillates.

Infinity Spirits

Infinity Spirits offers branded and bottled rum solutions to retailers and distributors. Solutions that bridge the gap between private labels and well-known rum brands, enabling our customers to offer variety and differentiation within their rum category.

We strive to provide rum brands that look unique, taste fantastic, are priced right and are delivered to our customers with excellent service and reliability.

Hein Smit

For more than eight years, Hein Smit was one of the Master Rum Blenders at E&A Scheer, which is the largest rum company in the world and the driving force behind hundreds of rum brands worldwide.

Hein was tasked with creating custom rum blends for spirits producers in more than 50 countries around the world. This long experience has provided Hein with the right knowledge of rum consumers around the world.

SPIRIT DEPOT

Piccadilly Distillery

The malt distillery was established in 2012. Today it is the largest independent malt producer and malt spirit marketer in India.

The distillery has 6 Scottish-style copper alembics that produce 12,000 liters of malt spirit per day and 4 million liters per year.

The distillery also includes a cooperage facility where, coming mainly from the town of Bareilly, top specialists take care of and prepare the barrels to give back as much of their soul as possible.

Personalities whisky

Surrinder Kumar is India's most recognized personality in the whisky world, widely regarded as the father of the category. He previously worked as Master Blender for Amrut distillery, where he established and ran their single malt program, showing the world India's potential to produce whiskies of great complexity.

Nancy Fraley is one of the best Master Blenders in America. Her journey has been a truly unique one, from her theological education and law practice to finding her calling in the world of whiskey. Nancy also serves as the Director of Education for the American Distilling Institute (ADI).

SPIRIT DEPOT

[spirit depot](#)

[our partners](#)

Elk Avenue Distillery

Our distillery in Crested Butte is located almost 9,000 feet above sea level. The altitude affects our rums - the distillation process takes place at a lower temperature than at other distilleries. This makes the rums exceptionally smooth while retaining the fullness of their aromas and flavors. Aging in barrels at altitude also adds character: the natural temperature fluctuations in our barrel composition cause the rums to "come in" and "come out of the oak" more often. The rums are smoother and offer more complex flavors as a result.

Karen Hoskin Woman Master Distiller

Karen Hoskin's main career over the years was as a global brand developer and marketer - for 19 years she created and built the brand identity and innovation of each of her projects.

She abandoned her career to focus on her new creation - distilling the best rums in the United States.

A black and white photograph of a distillery. In the foreground, a large, dark, rounded metal vessel (likely an alembic) is visible. In the background, a sign with the word 'TEERENPELI' in large, serif capital letters is mounted on a metal frame. The image is slightly blurred, giving it a vintage or industrial feel.

Teerenpeli Distillery

The family-owned Teerenpeli distillery was founded in 2002 in Lahti, Finland. Today, the distillery is the largest distillery in Finland specializing in the production of premium single malt whisky.

We use traditional alembics, handmade in Scotland, and the alcohol is matured in oak barrels. We mainly use sherry and bourbon barrels in our production. We also mature whisky in various batches of port, madeira wine and rum barrels.

Two distilleries

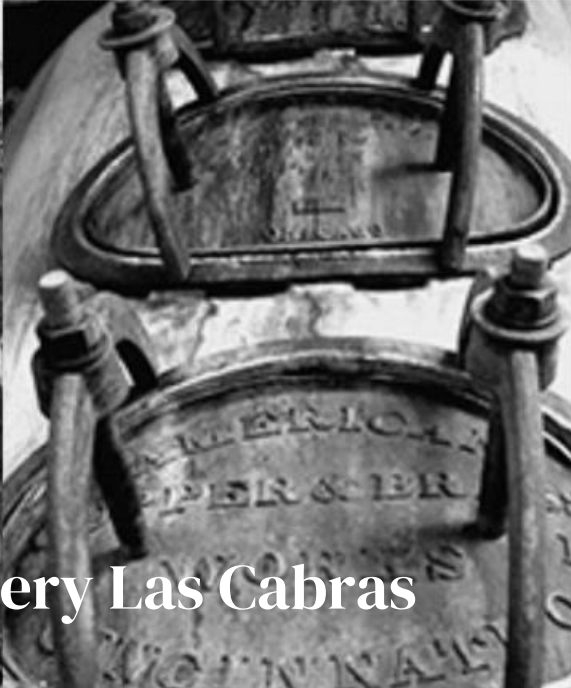

The original Teerenpeli distillery is located in the same building as the Taivaanranta restaurant in downtown Lahti, Finland. A brand new distillery opened in 2015 at the Teerenpeli brewery 10 minutes from downtown Lahti, increasing total capacity to more than 100,000 liters of new alcohol per year. The original distillery in the city center continues to distill, also allowing for interesting product development.

Distillery Las Cabras

Las Cabras Distillery was established in 1919 as a sugar mill. Since then, ownership has passed between the government, international investors and failed businessmen.

In the mid-1990s, "Don Pancho" and Carlos Esquivel discovered a neglected warehouse. Under the overgrown grass, they discovered a copper column with a small medallion inscribed "Cincinnati 1922." The skills and experience of "Don Pancho" were soon put to good use, and Las Cabras was transformed into one of the largest rum distilleries in the world.

Herrera in Panamie

Panama's central Herrera province is known for its abundant sugarcane fields, which grow in nutrient-rich volcanic soil fed by rivers from mineral-rich mountain springs. The result is cane with the highest sugar content, ideal for producing molasses to make fine rum.

Meet „Maddie” and „Magnum”

We have affectionately named our state-of-the-art 450-liter alembic from Carl, a German company. It is "she" who provides unparalleled control and consistency in handcrafting craft spirits. Carl is a family-owned company that has been designing and building the world's finest copper alembics since 1869. Our 25-liter copper alembic is used for small batches and for research in spirits development. It allows us to experiment with new recipes and botanical ingredients.

Calamba, Laguna, Filipiny

Traveling from Alaska to the Philippine pearls of the Orient, Peter Westfall has learned about plants, spices and fruits unheard of to Europeans. Using his scientific knowledge in creating distillation processes and combining it with learning about new ingredients, he creates the first, kraft distillery in the Philippines.

Today, the distillery is now headed by the third generation of the Westfall family, and their journey in learning about the "new", has spanned over 100 years.

SPIRIT DEPOT

„Spirit of Costa Rica”

Unhurried

Ron Centenario has rightly been called the "Spirit of Costa Rica." Surrounded by the Pacific and the Caribbean, Costa Rica benefits from a variety of microclimates and unique weather conditions. The country, with its relatively small population of 5 million, is blessed with an astonishingly high biodiversity - as much as 5% of the globe's total! Preserving this natural beauty is a matter close to the heart for Costa Ricans.

Take your time, this is the true meaning of pleasure. Since 1883, we have put this philosophy at the center of our beverage production. We know too well that quality takes time. So let's take our time. Using only natural ingredients and traditional alembics. We take care of the entire process. The result? World-class drinks you can enjoy.

SPIRIT DEPOT

Our heritage is Africa's heritage

The first high-quality rum from a single estate in South Africa, each bottle of our rum is filled with the dreams of every member of the Tapanga family. Each sip unfolds a piece of our history. Tapanga's heritage is intertwined with Africa's heritage. From the sunrise before dawn and the smell of burning sugar cane to the heat and humidity, every part of this process creates the pattern of our daily life.

This kind of rum is only possible through an unhurried aging process that sets the bar for the extraordinary. Making rum for the connoisseur of fine spirits.

Tapanga Estate

It's no coincidence that our name includes the word "panga," meaning a knife used to harvest sugar cane.

Tapanga is a rum produced on our family estate, grown and distilled on a sugar cane farm in the Gingindlovu district of Kwazulu Natal.

It is the first distillery in South Africa to produce Rhum Agricole, a rum based on fermented sugar cane juice.

SPIRIT DEPOT

spirit depot

Resting barrels

Nativo Rum rests in American oak bourbon barrels. Oak bourbon barrels give the final touch to our product. The barrels undergo a "baptism by fire" to revive the trapped compounds of previous generations of rums. Barrels are carefully selected for their contribution to the aroma, color and flavor of the final blend.

We use 10% new barrels to have a unique profile and flavor. The proportion of angels: we lose 12% per year, 2nd and 3rd year 8% and it is replenished with other barrels from the same year again.

Panama, country of 500 rivers

The journey begins with the harvesting of sugarcane near Panama. Panama is located between the Pacific Ocean and the tropical rainforest in the northern part of Panama.

Panama is a tropical paradise with average temperatures ranging from 27 to 35 degrees. Panama's rugged landscape is decorated with nearly 500 rivers. This provides the best conditions for planting sugarcane.

From Carrickmacross to Crossmaglen

There is an old saying that goes: "From Carrickmacross to Crossmaglen there are more Villains than Honest People." A young man was in a bar in Carrickmacross on a bright day and had been drinking. Later that day he was arrested for drinking. When he appeared before the court, the judge asked what he had to say about himself. In his defense, he claimed that someone had added whiskey to his tea! The judge then announced: "From Carrickmacross to Crossmaglen there are more scoundrels than honest people." Years later, the famous Irish poet and novelist Patrick Kavanagh of Inniskeen County, Monaghan, immortalized this saying.

Old Carrick Mill

Old Carrick Mill is an artisan distillery, operating in an old flour mill dating back more than two centuries. Located in the rugged landscape of Ireland's ancient east in Carrickmacross, County Monaghan.

At the Old Carrick Mill distillery, we use centuries-old Irish traditions combined with modernity to create a product steeped in Irish heritage and unique flavors.

Grecce – in the sunshine

Nature is the best place to start creating Greek gin, there you will find all the herbs that make gin unique, tasteful yet full of character. We combined Greek nature with the pleasure we find in the small joys of life and created GIN FROM THE EARTH: VOTANIKON GIN. Full of dryness, earthiness. Spices, and herbs are dried in the full sun through which they retain much of their natural depth of flavor.

DS Concepts

Made from the very essence of the Greek land, all spirits in the DS Concepts portfolio are made in Greece to approximate the climate and ancient character of the country.

At DS Concepts, we believe in offering our customers brands that are new and exciting, in addition to those that have stood the test of time. Listening and adapting to the needs of our consumers is of utmost importance to us.

5 generations
BOOMSMA

Unhurried

In 1883, Dirk Boomsma opened a distillery in Leeuwarden at the foot of the Oldehove tower. Little did he know that his name and his life's work would survive to this day. The fifth generation of Boomsmas, Saskia and Chantoine, continues to build on his dream. With the same commitment and international ambitions. Since day one, Boomsma has produced genever, beerenburg and liqueurs (which we continue to produce according to our age-old recipes). In addition, Boomsma offers a range of foreign spirits, such as Glen Talloch Whisky, Esbjaerg Vodka and Old Captain Rum.

Take your time, this is the true meaning of pleasure. Since 1883, we have put this philosophy at the center of our beverage production. We know too well that quality takes time. So we take our time. Using only natural ingredients and traditional alembics. We take care of the entire process. The result? World-class drinks you can enjoy.

QUINTA DO MEIRAL

Licor Beirão

Quintado Meiral, located in Portugal's central region, is the headquarters of Licor Beirão and home to the Redondo family, which has owned the brand for more than 70 years. Located on twelve slopes of the mountain around the village of Lousã, all the herbs for the production of this liqueur are grown. "It is here, in Meiral, that José Redondo produces Licor Beirão every day based on a recipe inherited from his father and taught to him by his mother. Licor Beirão is born out of this family's passion and continues in its third generation, spreading the spirit of Portugal around the world.

Liquid Company

Liquid Company is the exclusive international distributor of Licor Beirão, with current sales in 70 countries. The company also intends to be the voice of other Portuguese products - spirits and wines - in the international market.

"We will be the voice of this movement of growing demand for Portuguese products. Portugal is trending and we can help create excellent products."
Daniel Redondo, CEO
